PROFILE SUMMARY

As a Full-stack Web Developer with expertise in PHP and JavaScript ecosystems. I have successfully completed a variety of web applications, ranging from comprehensive website development to smaller programming tasks. I collaborate effectively with team members to improve workflow efficiency and code quality. I continuously expand my technical skills to develop reliable web applications that deliver great results for clients.

WORK EXPERIENCES

Freelance | Gombong - Kebumen, Indonesia
Web Developer, April 2025 – present

- Dedicated time to advancing expertise in modern web development for full-stack optimization techniques.
- Actively contributed on freelance project such as: developed and launched *rumahgenerasiunggul.com*, provided *bug-fixing support* for *lumious.com's* inventory management system, enhanced financial application features (cash flow & balance sheet modules) for *PT POS Indonesia*.

PT. Capture Data Teknologi | Jakarta Selatan, Indonesia

Senior Web Developer, April 2021 – April 2025

- Led a 2-member team to develop multiple critical features for the Online Assessment Platform, significantly improving the test-taking experience for users
- Established development workflows and coding standards that improved team collaboration and code quality across multiple projects
- Architected and implemented database optimization strategies that notably improved platform responsiveness and stability
- Managed deployment pipelines and maintained server infrastructure
- Configured and maintained Linux servers for web application hosting
- Mentored junior developers in best practices for full-stack web development
